

Erik Page is a recognized leader in the field of energy-efficient lighting with broad expertise across many areas including LEDs, fluorescent and compact fluorescent systems, lighting controls, luminaires, and photometry. Erik spent ten years as a researcher and lab manager in the Lighting Fixtures Laboratory at the Lawrence Berkeley National Laboratory before leaving to help establish the California Lighting Technology Center, where he served as the Director of Engineering for four years. In 2008 Erik established Erik Page & Associates, Inc., a small consulting firm based in Fairfax, CA, providing clients with technically robust support for various projects related to domestic (USA) and international energy efficient lighting projects. He has authored dozens of publications and holds eleven US Patents.
